

Project Demo Planning

Date	15 March 2026
Team ID	SWTID-2026-2749
Project Name	OptiCrop: Smart Agricultural Production Optimization engine
Maximum Marks	1 Mark

Project Demo Planning:

This demo plan outlines the structured presentation of the OptiCrop project, ensuring that each team member effectively demonstrates their assigned module while highlighting the project's key functionalities, machine learning workflow, and web application in a clear and organized manner.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction	Introduce the project, problem statement, objectives, and project workflow.	3	Shaik Mubeena (Team Lead)
2	Dataset & Machine Learning	Explain the dataset, preprocessing, EDA, model training, and performance evaluation	5	Jinka Padma
3	Flask Web Application	Demonstrate the web interface and explain the system architecture.	3	Shaik Mubeena (Team Lead)
4	Live Crop Prediction	Perform real-time crop prediction using soil and environmental parameters.	4	Shaik Mubeena (Team Lead)
5	Project Features & Future Scope	Present implemented features, scalability plan, and future enhancements.	3	Pulivarthi Sravani
6	Conclusion & Q&A	Summarize the project and answer evaluator questions.	2	All Team Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the agricultural problem and the motivation behind developing OptiCrop
2	Solution Overview	Present the project architecture, dataset, machine learning workflow, and technologies used.
3	Live Feature Demonstration	Demonstrate the Flask web application and perform real-time crop prediction using sample inputs.
4	Q&A Session	Address evaluator questions, explain design decisions, and discuss future enhancements.
